Linked In:<https://www.linkedin.com/in/devarapu-mounika-bala-katyaini-b379462b3>

Address:Narsapuram,West Godavari District -534275

CAREER OBJECTIVE:

Seeking an entry-level position in software development, where I can leverage my knowledge of programming languages, Web developing and Database management.Looking to enhance my Skills while contributing to the Organization's technical growth.

ACADEMIC INTERNSHIPS:

- Artificial Intelligence Intern

IIDT – Blackbucks | Remote | May 2024 – June 2024

Gained hands-on experience in Data Visualization, Machine Learning, and AI concepts.Completed a project titled "Supermarket Sales Analysis", focused on Exploratory Data Analysis (EDA) and creating interactive visualizations using tools like Python and Tableau.

- Web Development Intern

InnoByte Services | Remote | Apr 2024 – June 2024

Successfully completed a web development internship focused on modern front-end technologies.

Redesigned and modernized the website for KingSukh Guest House using HTML, CSS, and JavaScript to improve UI/UX.

Worked on responsive design and optimized the site's layout for better user engagement.

- IIDT – Blackbucks | Remote | May 2025 – July 2025

Pizza Ordering Chatbot | Python, Generative AI, NLP

Successfully built a fully functional pizza-ordering chatbot capable of responding naturally, collecting complete orders, and assisting users with a smooth conversational experience.Built a conversational AI chatbot using Python and a Generative AI model (Gemini/ChatGPT API) to take pizza orders (type, size, toppings, extras),validate user inputs, generate order summaries,and capture address & payment details.

SKILLS:

- Web Technologies:HTML,CSS,JavaScript
- Programming Languages:C,Python,Java,SQL,C++,R Programming
- Data Analytics & Visualization: Tableau
- Soft Skills:Adaptability,Communication Skills,Problem Solving Skills

EDUCATION:

BTech,Computer Science and Engineering:SAGI RAMA KRISHNAM RAJU ENGINEERING COLLEGE

2022-2026

- CGPA-9.20

Intermediate:ADITYA JUNIOR COLLEGE

2020-2022

- MPC-97%

Secondary Education:NARAYANA E-TECHNO SCHOOL

2019-2020

- Percentage:94%

CERTIFICATIONS:

- Programming Essentials in Python : Cisco Networking Academy Program
- Programming In Java - NPTEL Swayam
- AWS Cloud- AICTE EduSkills Cohort
- Data Science For Engineers-NPTEL Swayam
- Foundations of Cloud IOT Edge-NPTEL Swayam

PROJECTS:

Multimodal Fake News Detection System:

- Developed an end-to-end deep learning-based system to detect fake news by analyzing both textual and visual content. The system processes news text and images simultaneously to improve detection accuracy compared to traditional methods. It incorporates text analysis, image feature extraction, OCR for extracting embedded text from images, and deepfake detection techniques to verify image authenticity.The extracted features are combined using a fusion-based approach for final classification as real or fake. A user-friendly interface was built for real-time prediction, and the model achieved better accuracy with stable performance.

Weather Forecast Application — Using OpenWeatherMap API

- Developed a desktop-based weather application with a user-friendly Tkinter GUI to display real-time weather information for any city. Integrated the **OpenWeatherMap API** to fetch live weather data, including temperature, humidity, wind speed, and current conditions. Implemented input placeholders, validation, and error handling to enhance usability and ensure accurate results. Built using **Python** as the core programming language, Tkinter for the graphical interface, and the Requests library for API calls and JSON data retrieval, providing a responsive and intuitive user experience.

Online Voting System:Email OTP based Voting System (Full Stack Project)

- Developed a secure online voting application using **Python and Flask** that allows users to register, verify their identity via email OTP, and cast votes digitally. Implemented unique email-based authentication with OTP generation and verification to ensure security before voting. Designed the system to prevent multiple votes from the same user and integrated an admin panel for real-time results display. Built the frontend with **HTML5, CSS3, and Jinja2 templates**, managed data with **SQLite**, and implemented email services using **Flask-Mail (SMTP with Gmail)** for OTP delivery, ensuring robust security through OTP-based authentication and unique vote tracking.
